

2019 American Society for Engineering Education Pacific Southwest (ASEE PSW) Conference

The American Society for Engineering Education Pacific Southwest (ASEE PSW) Section invites abstracts—for full papers, posters and workshops—for the **2019 ASEE PSW Annual Conference and Exposition**. This major regional conference, focusing on educational practice, innovation, and research in engineering education, is being hosted by the College of Engineering, Computer Science and Technology at the California State University Los Angeles on **April 4-6, 2019** with the theme of **“Inclusive and Engaged Learning: Enhancing Engineering Student Success”**.

Please consider submissions on topics relevant to engineering education including, but not limited to, courses and curricula, pedagogy and assessment, innovative and exploratory educational practice, industry partnerships, and other student success initiatives. The conference will be held in conjunction with the Engineering Liaison Council (ELC) meeting, and submissions on 2-year college education practices and pathways for community college transfer students are of great interest. Instructions and templates for abstract and full paper submissions can be found on the conference website: <http://aseepsw2019.calstatela.edu/index.html>. Authors can submit two types of abstract: (1) full paper and (2) poster or workshop. **The deadline for abstract submission is Nov. 9, 2018.**

Joint Conference with the Engineering Liaison Council (ELC)

The 2019 PSW conference will be held in conjunction with the California Engineering Liaison Council (ELC) Spring meeting. The ELC is the one organization in California that networks all institutions of higher learning engaged in engineering education. The ELC will be hosting sessions on April 4-5 including workshops on teaching techniques, collaborative grant-funded 2-year to 4-year transfer bridge programs/pathways, and model transfer certificate programs in California.

Full Papers

Submission of a full paper is a three-step process consisting of an abstract review, followed by a draft paper review of accepted abstracts, and finally a full manuscript review. Abstracts will each receive one blind review; papers will be blind-reviewed by a minimum three reviewers. Acceptance of both the abstract and the final full manuscript is required for presentation in the conference and for inclusion in the conference proceedings (publish-to-present). Abstracts must be 250-500 words in length. Authors are encouraged to consult the Author's Kit at <http://aseepsw2019.calstatela.edu/index.html> before submitting. Accepted full papers will be published in the PSW conference proceedings.

Posters and Workshops

Abstracts for posters and workshops (250-500 words) should be submitted following the procedure described in the Author's Kit on the conference website <http://aseepsw2019.calstatela.edu/index.html>. Authors are encouraged to submit their work-in-progress as posters. A full paper is not required for a workshop or poster abstract. Authors should indicate on the abstract the type of presentation (workshop or poster) at the beginning of title as shown below:

1. For a poster submission, the title should be **“Poster: Your poster title”**
2. For a workshop submission, the title should be **“Workshop: Your workshop title”**

All abstract submissions will be through ASEE Monolith:
