Core Strengths and Values

- Have six years experience as Department Chair and five additional years experience as Associate Department Chair.
- Value and promote student success and am committed to creating a diverse and inclusive environment; I initiated and empower a departmental student advisory council, developed a student mentoring program which includes alumni and peer-to-peer mentoring, and initiated a tutoring program for all students and a stipend for study program for at-risk students.
- Value and promote excellence in the faculty in all aspects of academic life: teaching, research, service, and engagement; I ensure expectations are clear, work towards a common vision, and provide the resources that faculty need to be successful, including faculty mentoring programs, teaching workshops, and venues for recognition.
- Enjoy friend- and fund-raising; obtained a \$ 1 M industrial gift to renovate the TTU ChE teaching laboratories and an additional \$ 1.2 M pilot-scale distillation unit; obtained upper administration approval and support for a major department renovation and expansion.
- Am fiscally responsible with good budget management skills; since becoming chair, I have increased the resources available to the chemical engineering faculty and students and increased faculty productivity while overseeing a near doubling of our undergraduate students and a nearly 50 % increase in graduate student enrollment.
- Am knowledgeable concerning assessment and use benchmarking to help drive change; successfully led the last accreditation cycle for which the department received recognition as an exemplary report showcased at the 2018 ABET Symposium.
- Am committed to safety in both research and teaching laboratories and work closely with the department's safety officer; lead the college in promoting safety through a variety of means.
- Possess a strong record of publication, funding, and recognition for my own scholarship, with 115 publications, an h-index of 31, and several national awards and fellowships.

Outreach

Faculty Organizer for Science–It's a Girl Thing Program, for junior-high school girls. The girls attended our program for approximately 15 - 16 hours over three to four days from 2010 to 2014. From 2015-2018, the girls attended our program for 8 hours over four days. Experiments were similar but more advanced than those in Super Saturdays and also included investigating polymer crystallization and making bread.
